*[NOTE: Continuity. In order to maintain continuity and readability in producing the dissertation, avoid isolating words or lines at the beginning or end of a page. There always should be at least two lines of a paragraph at the bottom of a page and at least one and a half lines at the top of the following page. Never leave a single line of a paragraph at the bottom or top of a page (i.e., avoid "widows and orphans"). Also, a word should never be hyphenated and carried over to the next page. Most word processing programs have a format option which can handle widow and orphan problems. ]*
