

The AADMD Proudly Presents:

Physician Education in Developmental Disabilities

Sponsored by the Florida Developmental Disabilities Council

The AADMD is proud to offer a free, 12 credit-hour webinar series based on the first internationally vetted curriculum in Developmental Medicine created in the United States. This series is designed to enhance the practice skill of primary care physicians and residents who would like to provide better care to their adult patients with developmental disabilities.

Each webinar is accredited by the American Academy of Family Physicians for 1.0 hours of prescribed credit (recognized by the AMA as equivalent to Category 1 credit). A total of up to 12.0 credit hours are available, at no cost, for those who participate in all of the webinars. The live events have already occurred, however, the recordings of these webinars are available for CME credit at the links below.

This series is available for continuing medical education credit only. If you are not a physician please check with your specific professional or licensing board to see if this series will qualify for your educational requirements.
